## Amendments to the Claims

This listing of claims replaces all prior versions, and listings, of claims in the aboveidentified application:

## **Listing of Claims**

1. (Currently Amended) A wound dressing comprising an apertured liquid permeable substrate and an absorbent, nonadherent polymer composition comprising:

a hydrophobic organic polymer matrix;

an optional plasticizing agent; and

hydrophilic organic microparticles;

wherein the polymer matrix, optional plasticizing agent, and microparticles are selected to form an absorbent, nonadherent polymer composition.

- 2. (Original) The wound dressing of claim 1 wherein the hydrophobic organic polymer matrix comprises a styrene-isoprene-styrene copolymer, a styrene-butadiene-styrene copolymer, or mixtures thereof.
- (Original) The wound dressing of claim 1 wherein the composition comprises a plasticizing agent.
- 4. (Previously Presented) The wound dressing of claim 1 wherein the microparticles when in a nonhydrated form have an average particle size of 10 microns or less.
- 5. (Previously Presented) The wound dressing of claim 4 wherein the microparticles when in a nonhydrated form have an average particle size of 1 micron or less.

- 6. (Previously Presented) The wound dressing of claim 5 wherein the microparticles when in a nonhydrated form have an average particle size of 0.5 micron or less.
- 7. (Original) The wound dressing of claim 1 wherein the apertured liquid permeable substrate comprises 1 to 225 apertures per square centimeter.
- 8. (Original) The wound dressing of claim 1 wherein the apertured liquid permeable substrate comprises apertures having an average opening size of 0.1 millimeter to 0.5 centimeter.
- 9. (Original) The wound dressing of claim 1 wherein the microparticles comprise an aminecontaining organic polymer.
- 10. (Original) The wound dressing of claim 9 wherein the amine-containing organic polymer microparticles comprise a quaternary ammonium salt of an organic polymer.
- 11. (Original) The wound dressing of claim 10 wherein the microparticles comprise a cationic homopolymer of the methyl chloride quaternary salt of 2-(dimethylamino)ethyl methacrylate.
- 12. (Original) The wound dressing of claim 1 wherein the microparticles comprise a copolymer of sodium acrylate and acrylic acid.
- 13. (Original) The wound dressing of claim 1 wherein the microparticles are in the form of a dispersion.
- 14. (Previously Presented) The wound dressing of claim 1 wherein the absorbent, nonadherent polymer composition further comprises a bioactive agent.

For: WOUND DRESSINGS AND METHODS

- 15. (Original) The wound dressing of claim 14 wherein the bioactive agent is an antimicrobial agent.
- 16. (Currently Amended) The wound dressing of claim 1 wherein the polymer composition further comprises one or more additional additives an additive selected from the group consisting of a tackifier, a crosslinking agent, a stabilizer, a compatibilizer, an extruding aid, a filler, a pigment, a dye, a swelling agent, a chain transfer-agent, and combinations thereof.
- 17. (Original) The wound dressing of claim 1 wherein the hydrophobic organic polymer matrix comprises a mixture of two or more polymers.
- 18. (Original) The wound dressing of claim 1 wherein the microparticles are present in an amount of 1 wt-% to 60 wt-%, based on the total weight of the polymer composition.
- 19. (Currently Amended) A wound dressing comprising an apertured liquid permeable substrate and an absorbent, nonadherent polymer composition comprising:
- a hydrophobic organic polymer matrix comprising a styrene-isoprene-styrene copolymer, a styrene-butadiene-styrene copolymer, or mixtures thereof;

an optional plasticizing agent; and

hydrophilic microparticles comprising an amine-containing organic polymer;

wherein the polymer matrix, optional plasticizing agent, and microparticles are selected to form an absorbent, nonadherent polymer composition.

20. (Currently Amended) A wound dressing comprising an apertured liquid permeable substrate and an absorbent, nonadherent polymer composition comprising:

a hydrophobic organic polymer matrix comprising a styrene-isoprene-styrene copolymer, a styrene-butadiene-styrene copolymer, or mixtures thereof;

an optional plasticizing agent; and

hydrophilic microparticles comprising a sodium polyacrylate copolymer:

wherein the polymer matrix, optional plasticizing agent, and microparticles are selected

to form an absorbent, nonadherent polymer composition.

- 21. (Original) A method of treating a wound, the method comprising applying the wound dressing of claim 1 to the wound.
- 22. (Original) A method of treating a wound, the method comprising applying the wound dressing of claim 19 to the wound.
- 23. (Original) A method of treating a wound, the method comprising applying the wound dressing of claim 20 to the wound.
- 24. (New) The wound dressing of claim 1 wherein the hydrophobic organic polymer matrix comprises a polyisobutylene, polyethylene-propylene rubber, polyethylene-propylene diene-modified rubber, polyisoprene, styrene-isoprene-styrene, styrene-butadiene-styrene, styrene-ethylene-propylene-styrene, or combinations thereof.
- 25. (New) The wound dressing of claim 24 wherein the hydrophobic organic polymer matrix comprises styrene-ethylene-butylene-styrene.
